Non-Handicap Selections.

The suggested stakes are based upon our PBS321 staking strategy. They assume a normal stake of 1 pound - you should adjust your normal stake accordingly.

If the selection is 3rd rated then you should multiply your stake by 0.678. If the selection is 2rd rated then you should multiply your stake by 1.356. If the selection is Top rated then you should multiply your stake by 2.034.

Basically - 3rd rated then you should reduce your normal stake by a third. 2nd rated then you should a third to your normal stake. Top rated then you should double your normal stake.

Do not bet on odds on selections - the easiest way to do this is to put a minimum limit of 2.0 when you place the bet.

Course	Time	Horse	LTO	R4 Status	Stake	Result	Price

I'm sorry but there are no Selections today.
